Book Synopsis

Susan Kolb a medical doctor who is uniquely qualified to tell this story because she has a specialty in plastic and reconstructive surgery, as well as extensive training in holistic medicine. Furthermore, both silicone and saline breast implants have been in her body, and she confronted the health challenges such prosthetic devices can produce. While her story is very personal, it also reflects the experience of hundreds of thousands of other women.

The story she tells involves multinational corporations, public health concerns and governmental organizations that have betrayed the very people they are charged with protecting. Suppressed research, legal battles, government hearings, political corruption and corporate greed are part of this saga. Yet it is also about healing, for it contains the promise that those involved will learn greater responsibility. As Dr. Kolb says, "Sometimes we all have to learn the hard way."
